CSSI Announces Subcontractor Win on FAA Contract

Washington, DC – CSSI announces a win as a subcontractor to Metron Aviation under the System Engineering 2020 (SE-2020) Research and Mission Analysis Set-Aside contract. The Federal Aviation Administration (FAA) awarded Metron Aviation, as prime contractor, and its team a ten-year contract valued at \$1.15 billion.

SE-2020 is the FAA’s strategic program intended to modernize our nation’s airspace system into the Next Generation of Air Transportation System (NextGen). CSSI, as a member of the team, will work with other industry leaders to provide domain expertise and specifically offer system engineering and business support resources.

“The Metron Aviation team brings together the unique capabilities of the industry’s top research organizations, large system integrators, solution providers, manufacturers, academic institutions and subject matter experts to assist the FAA in advancing NextGen,” said Stephanie Fraser, Metron’s Vice President of Advanced Research and Engineering.

CSSI CEO, Cynthia Castillo, concurs with the outstanding capabilities of the team: “CSSI is extremely pleased to be a part of this important team of air traffic management innovators. We are looking forward applying our special expertise to help meet NextGen engineering and management challenges in the coming decade.”

About CSSI and SE-2020

CSSI was founded in 1990 as a provider of technical services in air traffic management. Today, it is a dynamic technical services company offering expert capabilities in engineering, information technology, and safety and applied research to the aerospace, defense, and transportation sectors.

CSSI has been a trusted contractor to the FAA, participating in some of the agency’s most critical programs. In April 2010, CSSI was awarded a \$280 million contract to perform engineering work as part of the broader SE-2020 program structure. SE-2020 has a ceiling of approximately \$7 billion, making it the largest contract in the FAA’s history. Work to be performed will include system engineering, program planning and financial management activities that occur throughout the Acquisition Management System (AMS) Life Cycle.

=====

***About CSSI.** Founded in 1990 as an air traffic management technical services provider, CSSI is successfully leveraging a unique combination of engineering, information technology, and applied research competencies to provide superior high technology services. The company is headquartered in Washington, DC, with offices and/or client co-located sites in several other locations. For more information, visit www.cssiinc.com.*
