CSSI Named to GSA OASIS SB Contract Vehicle

Washington, DC – CSSI, Inc., a leading provider of transportation and mobility solutions to government and commercial clients, recently secured prime positions on two pools under GSA’s One Acquisition Solution for Integrated Services (OASIS) Small Business (SB) program, a \$60-billion, 10-year vehicle designed to streamline the purchasing process and offer government customers easier access to vendors.

Specifically, CSSI will compete for work in pools 4 and 6 (NAICS Code 541712). The win puts CSSI on a list of companies from which federal users can choose for professional services offerings, including logistics, management consulting, IT, engineering, financial management and scientific trades and services.

“This is a big win for us; it puts us in a prime contractor position on an important vehicle and we are excited about working with clients to solve their challenges,” said Cynthia Castillo, president and CEO of CSSI. “GSA OASIS is the vehicle of choice for the US Air Force Life Cycle Management Center (AFLCMC) and the Air Force Research Lab (AFRL), and it’s open to many other government agencies.”

According to GSA, OASIS SB is a 100-percent small business set-aside contract that was developed in response to the government’s need for a hybrid, government-wide acquisition vehicle. OASIS SB is designed to reduce duplication of contracting efforts across the government and provide federal agencies with comprehensive, integrated professional services contract options.

For more information about using GSA OASIS to work with CSSI, or to partner with CSSI on the contract vehicle, contact James Powell at 202-747-2430.
